PISTON COMPRESSORS BLUE SERIES

→ Blue series compressors are compact direct driven devices.

Compressors of this series are able to work in cycles of 30% - 70%
(30% compression time - 70% recovery time for every 10 minutes)

PISTON COMPRESSORS BLUE SERIES SPECIALIST LINE - 8 BAR

36943

Oil-free compressor.

This handy model is perfect for small demands in compressed air. Due to small size compressor is very easy to transport.

Especially dedicated for hobbyists, for small installation pressure testing, for blowing electrical devices etc.

36741-K1

Oil-free compressor.

HLO 215-25 is a device for occasional use. Using of an oil-free pump significantly improves the quality of compressed air and eliminates the need for cyclical replacement of the lubricating fluid.

36546

The compact piston compressor H 185-6 is designed for light work. Oil-free pump ensures relatively good quality compressed air.

Easy transport thanks to small dimensions and low weight makes them an ideal solution for IT specialists, work with airbrushes or pressure tests.

PISTON COMPRESSORS

Blue Series Professional Line - 10 bar

compressoren

www.airpress.net

PROFESSIONAL PISTON COMPRESSORS BLUE LINE - 10 BAR

Compressors of the LM series are modern devices with relatively high efficiency due to the use of 2 piston pumps. The reduced pump speed to 1450 rpm means that they can operate in longer cycles.

Large pneumatic wheels and a comfortable grip allow easy movement of compressors even on unpaved surfaces. Especially recommended on construction sites with spray pistols or nailers.

PISTON COMPRESSORS

These are super quiet compressors manufactured in Europe according to the highest quality standards.

The sound level up to 50 dB makes them practically inaudible.
High quality and quiet operation allows them to be used in chemical laboratories or scientific laboratories.

They are also ideal for tests in the field of force pneumatics and the tightness of all installations.
Equipped with a filtroreducer to improve air quality and full pressure control.

PROFESSIONAL PISTON COMPRESSORS HL / HK / VK SERIES

→ Piston compressors with the Airpress belt gear series HL, HK and VK are professional devices designed for work in service plants, car workshops and small industry. Carefully selected components manufactured in the European Union guarantee their long life.
The models offered since March 2017 have modern K series compressor pumps with increased efficiency, which significantly improves the compressor parameters.

→ ADVANTAGES OF PISTON COMPRESSORS WITH BELT DRIVE:

- Modern compressor blocks serie-K with increased efficiency produced in 100% within the EU.
- The pump speed reduces the operating temperature and allows longer compression cycles.
- The metal sheaves of the pulleys and the efficient cooling vanes allow better airflow and cooling of the pump.
- Enlarged interstage coolers and exhaust coolers reduce the temperature of compressed air.
- Presostats from the renown Condor brand with thermal protection.
- Ready-to-use devices with electrical plugs.
- A wide range of compressors allows you to choose the optimal device for each recipient.
- 3-year warranty for devices from this series.
- The SD models have a star-delta starting module to facilitate the restart of the device and reduce the inrush current.

① Made of copper, the pressure pipe is more resistant to high temperatures and improves cooling.

② The metal belt cover has an open structure. Allows optimal cooling air flow.

③ A pulley with large blades that improve cooling.

④ Enlarged interstage coolers reduce the temperature of compressed air.

⑤ Star-delta starting system used in powerful engines.

⑥ Intake and exhaust valves made of hardened steel with a longer service life.

⑦ A unique oil pan with closed bottom cover, which prevents oil leakage.

⑧ Equipped with Condor pressure switch with high reliability with thermal protection.

⑨ Condensate drain valve.

PROFESSIONAL PISTON COMPRESSORS GK SERIES MOUNTED ON GALVANIZED TANK

→ The GK compressors series is equipped with a double-sided galvanized tank. They are designed to work in a particularly humid environment, in the agricultural sector and wherever they are exposed to adverse effects of corrosion. GK series compressors can operate in cycles of 40% - 60% for every 10 minutes (40% compression time - 60% rest time).

→ **THE ADVANTAGES OF GK SERIES COMPRESSORS:**

- Industrial pumps with reduced speed produced in 100% within the EU
- High performance of devices while maintaining a lower operating temperature
- The large oil cassette ensures good lubrication of the pump components and a lower operating temperature
- Easy control of oil condition
- Large exhaust and interstages coolers reduce the operating temperature of compressed air
- 10 years tank warranty (3 years for other items)

INDUSTRIAL PISTON COMPRESSORS K SERIES

- Industrial compressors Airpress K series are the highest quality piston compressors with low-speed operation and maximum pressure of 14 bar. Thanks to the use of the highest quality components, K series compressors were built for the purpose of plants where not only quality, but also the ability to work at higher working pressures are put in first place. The K series machines operate in a low-speed mode, which guarantees their extraordinary durability, and the efficient cooling system makes these compressors work in a 24-hour cycle, in 80% to 20% mode (48 min / 1h - work-to-rest ratio).
- The compressor pumps used in the K series are industrial two-stage compression blocks produced in the European Union from the highest quality components. In addition, they are equipped with two coolers: interstage and output, which significantly reduces the operating temperature.
- Professional electric motors in the K series are mounted in overhead cranes with an easily accessible belt tensioner. In Super versions, compressors are equipped with a star-delta start, which facilitates the start of the device and reduces the inrush current. The tanks in the Airpress K series compressors are made of thick-walled walls protected against corrosion, which guarantees their durability. Each K series compressor before leaving the factory is tested under operating pressure of 20 bar so that the customer receives a fully tested and ready for the toughest work of the device. The warranty for all components of K series compressors is granted for a period of 3 years.

- 1 The pressure pipe made of copper is more resistant to high temperatures and improves cooling.
- 2 Metal belt cover has an open structure. Allows optimal cooling air flow.
- 3 A pulley with large blades that improve cooling.
- 4 The only series of piston compressors with two-stage pumps from 3 HP / 2.2 kW.
- 5 Star-delta starting system used in more powerful engines.
- 6 Intake and exhaust valves made of hardened steel with a longer service life.
- 7 A unique oil pan with closed bottom cover, which prevents oil leakage.
- 8 Equipped with Condor pressure switch with high reliability with thermal protection.
- 9 Easily accessible belt tensioners, which shortens the machine's service life and save your time.
- 10 Condensate drain valve.

SILENCED PISTON COMPRESSORS PROFESSIONAL APZ SERIES

→ VERY LOW NOISE LEVEL

The electric piston compressor of the APZ silenced series located in a sound-absorbing casing, significantly reducing the volume level. The quietest reciprocating compressor in this embodiment emits noise-free noise at the level of 60 dB (A). A silenced compressor does not need to be placed in a separate room and can be used directly at work stations, due to the noise level, even in quiet production or service rooms.

The APZ series silenced compressor can be a good alternative for a screw compressor.

→ A SERIES OF SILENCED APZ COMPRESSORS, AS STANDARD EQUIPPED WITH:

- Manometer
- Hours counter (only from APZ 500)
- Control lamp
- Aftercooler
- Safety valve
- Star-delta starting (only from APZ 600)

PISTON COMPRESSORS WITH AN INTERNAL COMBUSTION ENGINE

→ COMPRESSORS WITH GASOLINE / DIESEL ENGINE

The Airpress piston compressor with an internal combustion engine is independent, professional and mobile source of compressed air.

Model with ON engine equipped with a power generator.

INTERNAL COMBUSTION ENGINE

1 Thanks to the use of the brand drive module, the customer receives a guarantee of compressor reliability even under the most difficult operating conditions.

EFFICIENT COMPRESSOR PUMPS

2 Exceptionally efficient piston blocks designed for mobile applications allow you to achieve maximum efficiency of the device.

EASE OF MOVEMENT

3 The combination of experience in the creation of stationary and mobile compressors in one design has allowed us to create a series of piston compressors characterized by exceptional performance while maintaining full mobility.

FULL MOBILITY

4 Thanks to the use of rubber, pumped wheels, the customer receives a device that can easily be moved even in relatively difficult terrain.

SCREW COMPRESSORS APS X SERIES NEW STANDARD

→ By constant investment in the development of our products, the Airpress Group presents a new series of screw compressors. The screw compressors are available from 5.5 kW up to 37 kW. The APS X-series is available in two versions: with a fixed speed or variable speed controlled.

Machines from 15 kW are available with a two-stage air end. These versions have an increased performance with the same power consumption as a single-stage version. Depending on the demand, these machines are available as a separate unit, mounted on a tank or mounted on a tank and equipped with a compressed air dryer.

Screw compressors APS X-series are characterized by a new generation air ends. The direct drive reduces the losses caused by the transmission. Reliable and efficient, easy-to-use screw compressors ensure trouble-free operation at minimum cost.

Equipped with a modern control panel, you can constantly monitor the screw compressor and change parameters if necessary.

APS X SERIES machines are equipped with two types of controllers:
MAM-860, MAM-6080 or MAM-6090.

Standard features of controllers are:

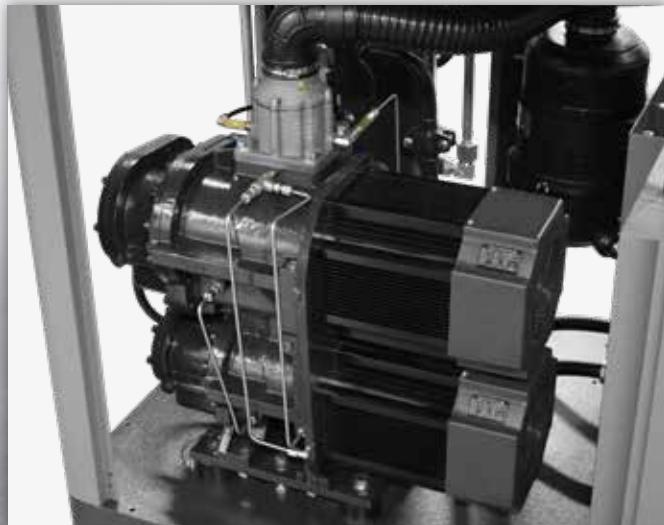

- pressure adjustment
- high temperature alert
- working hours overview
- set unload time
- current control
- voltage control
- service indicator

ONE-STAGE AIR END is directly connected without center bracket, belt and pulley. Transmission ration is 100%, and the efficiency is improved by 2-3% compared with asynchronous motor with the same specification.

This direct-driven means lower maintenance costs. No V-belts are installed and the performance is better because there are no losses due to slip or too tight tensioned V-belts.

TWO-STAGE COMPRESSION permanent magnet conversion air compressor which can save energy. Lower pressure ratio of level 1 and level 2 hosts (3:1), the return leakage is reduced and energy efficiency is improved.

The air compression process in the two stages is basically isothermal compression process, and energy saving is 15% under the same displacement.

HIGHLY-EFFICIENT PERMANENT MAGNET SYNCHRONOUS MOTOR (only with IVR models).

The motor has high power factor, small power dissipation, and efficiency higher than ordinary motor by 5-8%. Frequency application scope (0Hz - 200Hz) is wide, and motor efficiency under different load is basically constant. The motor has big torque, strong adaptability, loaded startup and strong follow-up ability.

The motor has no bearing and seal. Motor bearing fault point can be eliminated, thereby saving cost, and reducing daily maintenance and repair.

THE NEW GENERATION INVERTER designed especially for APS X IVR Series machines characterized by high efficiency, low energy consumption and no maintenance required. Our inverter machines are standard equipped with EMC filter. Using the inverter machine allows you to save up to 30% of energy costs.

SCREW COMPRESSORS APS BASIC SERIES

→ EASY OPERATION AND COMPACT SIZE

APS Basic series of screw compressors consists of models with power from 3 HP to 20 HP. They are compact devices addressed primarily to small and medium production plants, mechanical workshops, paintshops and body shops. The highest quality screw block, efficient electric motor with a star-triangle start-up and the intuitive ES 4000 Basic control panel make these devices reliable and easy to use and maintain.

APS Basic screw compressors are devices that can work in a continuous mode, making them ideal for plants where compressed air is an indispensable element of proper functioning.

→ ADVANTAGES OF THE APS BASIC SERIES:

- Compact design
- Intuitive operation and easy reading of work parameters
- Minimized operating noise level 61 - 69 dB (A)
- Low level of vibration
- Cooling system allowing for heat recovery
- Wide performance range from 240 L/min to 1860 L/min
- Available in 3 pressure versions: 8, 10, 13 bar

COMPRESSOR UNIT UP TO 15 KW

The most advanced technologies in the field of engine propulsion and oil tank design.
Optimal seals and bearings.

CONTROL PANEL ES 4000 BASIC

The new ES 4000 Basic control panel ensures safe,

easy and intuitive use of the compressor:

- Modern intuitive design
- Display based on icons
- Indicator of the number of working hours under load
- Emergency warnings
- Constant monitoring of compressor operation
- Temperature indicator
- Automatic start after power failure
- Setting of pressure ranges

DRYER

The compressor version with a dryer is an extremely compact design, economical and easy to install in places requiring dry air.

OIL LEVEL INDICATOR

Long intervals between maintenance. An external oil level indicator makes it easy to check. Easy access to the oil filter, air filter and separator.

SAFE INVESTMENT THANKS TO WHICH YOU EARN

APS Basic screw compressors are 30% more efficient than piston ones, and their durability is longer due to reduced vibration and the number of parts.

LESS NOISE, GREATER ENERGY EFFICIENCY

Quiet operation allows you to place the compressor directly at the workplace.

Star-delta starting and optimally selected idling time optimizes the consumption of electricity.

SCREW COMPRESSORS APS / APS-D SERIES

► ADVANTAGES OF SCREW COMPRESSORS OF THE APS / APS-D SERIES

The Airpress screw compressors of the APS and APS-D series, due to their compact and small construction, are addressed to small production plants, mechanical workshops, paintshops and body shops.

The highest quality screw unit and anti-vibration elements surprise with very low volume and energy efficiency.

ES 3000 CONTROL PANEL

Table with ES 3000 energy saving control panel equipped with, among others:

- Automatic compressor shutdown
- Main switch with access key
- Thermal protection of the electric motor

The ES 3000 panel ensures energy savings obtained by stopping the compressor operation after the shortest possible idling time allowed by the electric motor.

NEW GENERATION OF SCREW MODULES

The next-generation screw modules provide the best performance, improved design and reliability guaranteed by the manufacturer who assembles 25,000 such modules per year.

SIMPLE CONSTRUCTION

The good location of all service parts, such as belts, oil and air filters, and an external oil level indicator, provide extremely easy and quick maintenance. Long intervals between maintenance and ready-made service kits make the use of the device even more user-friendly.

DRY AND CLEAN AIR READY FOR USE

Models of screw compressors of the APS series, which are equipped with a dryer, provide dry and clean air. All devices also have a precise filter system that cleans the air from liquid and dust particles up to 0.1 microns. The result: dry and clean air suitable for most industrial applications.

DIRECT DRIVEN SCREW COMPRESSORS APS SERIES

→ Airpress screw compressors with direct drive series APS-DD and APS-BD are high-performance devices with advanced technological solutions.

The direct drive transmitted from the motor to the screw module significantly reduces vibrations, extends the compressor life and reduces operating costs. The version with built-in inverter (IVR) additionally controls the compressed air consumption in the plant and smoothly adjusts the speed and efficiency to the user's needs. The variable speed operation of APS-DD and APS-BD series compressors is the best choice for plants where compressed air is an indispensable element of the company's operation.

Compressors with a built-in inverter save up to 40% of electricity from rotary compressors.

ADVANCED ES 4000 CONTROL PANEL + MULTILOGIC

This system controls all compressor processes:

- Performs functional controls
- Informs about any irregularities in the compressor's operation
- Automatically stops the machine in case of danger
- It provides the most optimal settings for extending the working time
- A colorful, graphic display

OILS

→ TRUSTWORTHY AIRPRESS OILS

Developed over years of experience and proven in the toughest working conditions

→ OIL FOR SCREW COMPRESSORS ENSURES RELIABLE OPERATION FOR MANY YEARS

- Very stable at various temperatures
- Long life
- It guarantees effective lubrication without foaming

→ THE AIRPRESS PISTON COMPRESSOR OIL HOLDS FOR A LONG TIME

THE HIGHEST LUBRICATING PARAMETERS

- The original Airpress oil will ensure the best maintenance of the compressors
- Reliable protection even at high temperatures
- Immediate lubrication immediately after run machine

→ YOU CAN RELY ON OIL FOR THE AIRPRESS PNEUMATIC TOOLS

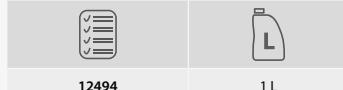

- A good „creep” effect
- It seals tool blades which allows you to achieve full power
- Effectively reduces tool wear

PISTON COMPRESSOR OIL

Professional mineral oil designed for the lubrication of various types of piston compressors operating in normal and severe conditions.

The oil is characterized by:

- very good anti-corrosive and anti-wear properties
- good resistance to oxidation
- good air release and low foaming tendency

SCREW COMPRESSOR OIL

Mineral oil intended for the lubrication of various types of screw compressors operating in normal and hard conditions.

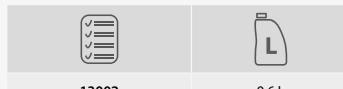

The oil is characterized by:

- very good anti-corrosive and anti-wear properties
- good resistance to oxidation
- good air release and low foaming tendency

OIL FOR PNEUMATIC TOOLS

Designed for lubrication of pneumatic devices, eg impact wrenches, grinders, drills, etc., which require lubrication of internal moving parts.

The oil is characterized by:

- good adhesion to the material
- no interactions with construction materials (aluminum, steel, rubber and plastic gaskets)
- good aging resistance (no sludge of moving parts in the long service life).

OIL FOR POWER GENERATORS

Engine oil for power generators and lawn mowers and gardening machines equipped with four-stroke engines.

COMPRESSED AIR TANKS

→ Air tanks are available in a very wide range of capacities. Starting from a relatively small 200 liter, ending with 20,000 liters. The pressure range is from 11 to 16 bar. Double-side galvanized tanks are also available. Our tanks have a CE certificate.

→ In our offer we have sets of fittings for compressed air, which include:

- safety valve
- manometer
- manometric valve
- connecting hose
- ball valves
- full UDT documentation

DRYERS

Refrigeration dryers APX Series / Adsorption dryers ADS Series

compressoren

www.airpress.net

REFRIGERATION DRYERS APX SERIES

- The APX models have an electronic control system with a dew point indicator.
All models are equipped with an automatic condensate drain.
All APX dryers reach a dew point of 3 °C.

ADSORPTION DRYERS ADS SERIES

- The ADS series is available with a pressure dew point from -25 to -70 °C.
They are designed for constant and effective drying of air from moisture, which efficiently performs a pressure dew point.

INDUSTRIAL COMPRESSED AIR ALUMINIUM PIPE INSTALLATIONS - AIRPRESS

→ The installation of compressed air has a huge impact on the quality of air transmission. Properly selected filtration of water, oil and microparticles will extend the lifespan of your tools and allow proper use of air in every area of the economy.

The best solution is professional support in choosing a compressed air system. That's why we offer not only support in this area, but also appropriate design of the installation, selection of appropriate pipe diameters and proper installation of air intake points and filtration to make work in your plant the most effective.

Creation of the installation in our system by a professional team will guarantee you the proper transmission of compressed air but also the tightness of the installation. Any leakage in the installation causes a drop in pressure, loss of compressed air and real costs associated with it.

Our installation system is quick and easy to install, immediately for use after assembly. Aluminum piping and polyamide fittings are resistant to oil and corrosion.

- High efficiency (\varnothing 20 mm sends about 1000 L / min)
- Easy assembly
- Working pressure 0.5 - 16 bar
- Resistant to vibration and stress,
- Max. ambient temperature +70 °C
- Available in diameters: 20 / 25 / 32 / 40 / 50 / 63 / 80 / 110 mm
- 10 year warranty on spills

MICROFILTERS / FILTRATION SETS OFM & OFAG2 SERIES / CYCLONE SEPARATORS / AUTOMATIC CONDENSATE DRAINS

↗ MICROFILTERS

Airpress air filters are available for many applications and are easy to use.

↗ FILTRATION SETS OFM & OFA SERIES

Airpress offers ready-made filter sets for special applications. The filters remove particles and partially moisture from the air, the membrane dry reaches a pressure dew point at -30 ° C, which effectively removes moisture. The final filter (activated carbon cartridge) will eventually remove residual oil fumes.

↗ CYCLONE SEPARATORS

- Effective moisture separators from high-efficiency compressed air:
- Capacity from 120 to 2850 m³ / h
- Connections from 3/8 „to 3“
- Pressure max. 16 bar

↗ AUTOMATIC CONDENSATE DRAINS

Automatic drains equipped with drainage sensors transfer condensate without unnecessary losses of compressed air.

Filtration: If we did not use devices to improve the purity of compressed air, a large part of this corrosive sludge would get into the compressed air network damaging the tools, pneumatic equipment and final product.

Thanks to Airpress air filters and air preparation stations, we prevent such events. Air filters are especially needed in painting.

To avoid so-called „eyelets“ on the painted surface, we recommend the use of Airpress air filters that guarantee the capture of solid particles, water and oil giving you confidence on the surface you are painting does not show the slightest flaw.

P: Pre-filter, filtration rate for particles of 3 µm, oil residue not more than 0.5 mg / m³

R: Pre-filter, filtration rate for particles of 3 µm, efficiency 99.99%

M: Microfilter, degree of filtration with respect to 1 µm particles, oil residue not more than 0.5 mg / m³, efficiency 99.99%

S: Microfilter, degree of filtration in relation to particles with a size of 0.01 µm, oil residue not more than 0.01 mg / m³, efficiency 99.99%

A: Activated carbon cartridge, filtration rate for particles with a size of 0.01 µm, oil residue not more than 0.005 mg / m³

A2: Advanced active carbon cartridge, residual oil less than 0.0005 mg / m³, indicated for oil-free air.

The OFM series filtration system is ready-made units for specific applications.

Delivered as assembled sets are quickly and easily adopted and used.

The filters clean solid particles, the activated carbon cartridge removes oil vapors, a membrane dryer effectively removes moisture reaching a pressure dew point of -30 ° C.

Thanks to OFM Airpress sets, compressed air is classified in accordance with ISO 8573-1.

ADSORPTION FILTRATION SETS OFAG2 SERIES

The continuous process of supplying compressed air systems and ready-made solutions has allowed us to develop a series of OFAG2 series filter sets. The series has been developed for all applications where compressed air is required in accordance with the ISO8573-1 class.

OFAG2 series products are unique on the market solutions „turn on and operate“ due to the fitted and assembled filtering system.

The filter base is an adsorption dryer with a pressure dew point at a minimum level of -20 ° C. A matched dryer allows you to get rid of moisture and minimize the consumption of cleansing air. The advantage of these sets is also the optimal installation of individual components without losses in the flow efficiency (no elements limiting the air flow).

Of course, just like the OFM series, the OFAG2 series is equipped with a number of filters necessary to clear the air from microparticles, moisture and oil up to class 1.3.1 / 0 according to ISO8573-1.

| OFAG2 120 | 12002-OFAG2 | -20°C / -25°C | 120 L/min | 3 µm / 0,01 µm | 3/8" / 1/2" | 17,5 kg |

CYCLONE SEPARATORS

Airpress cyclone separators are designed to clear compressed air from condensate that threatens installations, actuators and pneumatic tools. The use of a cyclone separator results in a condensate reduction in air of over 98%.

| 3/8" | 45134 | 16 bar | 2000 L/min |

| IED (for filtration systems) | 36233-IED |

FILTERS / REDUCERS / LUBRICATORS

- By using Airpress air treatment products, you provide the tools with the best working conditions and prolong their lives. The best treatment is successively used filters, reducers and lubricators.

Airpress also provides ready-made sets with a convenient wall bracket:

- Cover made of aluminum
- Durable glasses for temperature from a special material
- Versions of 10 and 14 bar
- High-quality components

HOSES / HOSE REELS

- • Professional hoses on reels and wall hangers.
• High-quality PU (polyurethane) hoses for indoor use.
• Very flexible hybrid hoses also suitable for low outside temperatures.
• All hoses on drums or reels have a solid steel / aluminum construction or durable ABS material.
• Whether wall or floor - we provide the best quality.

Professional spiral hoses made of polyurethane, equipped with a quick connector and plug with reinforcing springs.

Suitable for compressed air with a working pressure of 10 bar (at 23 °C).

Advantages: high performance, high flexibility, resistant to UV radiation.

Application: pneumatics, vehicle mechanics, industry, agriculture, others.

- Working pressure at 23 °C: 9 - 12 bar depending on the diameter of the pipe
- Length of straight sections: 10 cm / 50 cm
- Shore hardness: 98 A
- Working length: 80 - 90% of the total length

PROFESSIONAL PNEUMATIC TOOLS

QUALITY, EFFICIENCY, SAFETY

No matter where you are - in the workshop, factory or construction site, pneumatic tools Airpress provide the highest performance, comfortable working, and the durability and safety with no compromise.

- **QUALITY:**

The highest quality has been reached by optimally matched components, high-end materials and constant control of the production process. Each component is designed and adjusted to meet even the most demanding conditions and specifics of Your work.

- **HIGHEST PERFORMANCE:**

With highest components and the latest technologies Airpress tools provide the high performance, and due to excellent ergonomics allow for longer and more comfortable working.

- **ERGONOMY AND EASE OF USE:**

Improved ergonomics, compact size, low weight and excellent balance of the tools reduce fatigue of the user. Low vibration and noise levels, anti slip handles are increase comfort, and compact size helps You to get to difficult areas.

- **SAFETY:**

Pneumatic tools Airpress conform to all European standards of the vibration and noise levels. Carefully designed handles, safeguards, buttons and levers eliminate or reduce hazards in the workplace.

IMPACT WRENCH 1/2"

- The compact body design gives mechanics access to tight work areas, without compromising power. This model of Impact Wrench compares favorably with 3/4" tools on the market and yet is priced well below those bigger, heavier tools.
- Composite body and aluminum clutch housing and back cap for durability and light weight.
- Single control dial at rear of housing for improved regulator and direction control.
- Handle exhaust directs air away from work area
Soft overmolded handle and ergonomic trigger for comfort.

SPRAY GUNS HP

45103

45191

45194

45103 it's a high quality combination with an attractive price. Provides material saving and high transfer of applied varnish. A solid finish and an ergonomic body increases safety and comfort of work. Intended for painting with all types of paints and varnishes.

45191 is a perfect combination of high quality with a very attractive price. Perfectly breaks the paint particles by applying an even coat of varnish. Thanks to the low air demand, it allows the use of a smaller compressor. Intended for working with all types of paints and varnishes.

45194 is a gun dedicated to professionals. This spray gun is very popular due to the low air demand and the perfect breaking of material particles.

A wide range of nozzles from 1.3 mm to 2.2 mm. Particularly noteworthy is the aesthetics of this spray gun model. Intended for painting with all types of paints and varnishes.

 • Barcodes and numerics will facilitate sales and customer service.

SAFETY QUICK COUPLING

NEW IN OUR ASSORTMENT !!!

Use Airpress safety couplings for a safe working environment. The Occupational Health and Safety Act requires that hoses must be safely removed from a shortcut. In the event of accidents with unsafe shortcuts, the employer legally liable for the consequential damages. That's why we recommend Airpress's new safety couplings. Pressing once is venting the hose and pressing the second time is disconnecting the hose from the safety coupling. We also recommend the use of hardened plug nipples to guarantee the service life of the safety coupling.

| | |
|---------------------|--|
| • Working pressure | max. 12 bar |
| • Temperature range | -20 °C ~ +70 °C |
| • Flow | 1.600 l/min bij 6 bar |
| • Housing | Anodized aluminum (can be rotated 360 °) |
| • Button and valve | Hardened stainless steel |
| • Valve seat | made of stainless steel 1.4404 |
| • Gasket | NBR |

SAFETY COUPLINGS EURO

High-quality metal safety couplings with anodized aluminum alloy housing. 2-pressure mechanism for safe venting and disconnection of the hose without escaping from the coupling.

STARTER KIT WITH QUICK COUPLINGS AND PLUGS

**STARTER KIT WITH FREE STAND
FOR QUICK COUPLINGS AND PLUGS**
Stand dimensions: 520 x 270 x 570 mm

QUICK COUPLINGS & PLUGS

The set includes 18 models of plugs and quick couplings, 10 pieces of each type. 180 items in total.

FITTINGS FOR SPIRAL HOSES

GREASE FOR MAINTENANCE OF SPRAY GUNS

| |
|-------|
| |
| 14905 |

Product is perfect for maintenance of spray guns.
Silicon-free, acid-free grease, which is applied with a thin layer on all the moving parts of guns and threads.
This ensures a proper functioning of all the elements of the spray gun.

| | | 0,2 kg |

4300001 / 4300011

Aluminum air blowguns with short 20mm nozzle and a long 160mm nozzle.

45021 / 45023 / 45024 / 45025

Composite air blowguns with a thin tube for hard to reach places.
4 versions of lenght: 10, 25, 35 and 50cm.

4300003

Air blowgun with adjustable pressure to blow even delicate elements susceptible to easy damage. In standard with two nozzles: short and long and protective rubber pads.

- aluminum construction coated with anti-slip rubber
- short nozzle
- a long nozzle (112mm) with a rubber tip that protects against scratches
- thanks to pressure regulation - precise jet dosage,
- with 2 plugs: Euro / Orion
- hanging handle

TURBO BLOWGUN

Turbo blow gun with a turbo nozzle, which increases the power of the blown air by introducing it into a whirl movement. As standard with 2 plugs: Euro / Orion

| | | | |
|---------|-------|-------|-----------|

CURING LAMPS

→ Infrared heater with a short wave of radiation for quick drying of varnishes.

- strong steel construction
- high quality V-Power 50cm lamps
- equipped with a distance sensor (applies to the 79851 model)
- pre-drying mode - pulsating
- continuous operation for curing,
- electronic clock with LCD display (applies to models 79852 and 79851)
- range of temperature from 40°C to 100°C
- individual position adjustment of each lamp possible.
- rotating arm by 300 degrees
- wheels with bearings equipped with brakes

CURING LAMPS

79853

79852

79851

79853 construction made of aluminum. Equipped with quartz, 21 VPOWER short-wave halogen lamp. A unique mechanical timepiece, the flexibility of moving cartridges to any height above and along the car.

79852 / 79851 construction made of aluminum, equipped with quartz, halogen VPOWER 21 short-wave halogen lamps. Full automation, electronic timer with LCD display and digital power setting. Hydraulic lift, rotation around 300 degrees, independent switch, lamp power 3 x 1000 W, with distance sensor in the 79851 model.

PROFESSIONAL TOOLSET IN ALUMINUM CASE - 127 ELEMENTS

PROFESSIONAL TOOLSET IN ALUMINUM CASE - 127 ELEMENTS

This set is made from durable chrome-vanadium steel. Lockable tool case.

Contents:

Module 1:

- electric probe 220 - 250V
- screwdriver set 4 pcs
- adjustable pliers 250 mm
- pincers 250 mm
- combination pliers
- side cutting pliers 175 mm
- flat pliers 175 mm
- hand shears (universal)

Module 2:

- file
- hex keys (1,5 - 10 mm) 9 pcs
- at-ring keys (8 - 22 mm)
- adjustable wrench 250 mm

Module 3:

- punches / chisels 5 pcs
- precision screwdrivers 3 pcs with a knob
- electrical pliers
- pliers for Circlips with 4 tips
- knife with a set of interchangeable blades
- flashlight
- hacksaw with blade kit
- building level
- cable terminals

Module 4:

- sockets 1/4"(4 - 14 mm) 13 pcs
- sockets 1/2"(10 - 32 mm) 13 pcs
- ratchet 1/2" and 1/4"
- 2 extensions 1/4"
- 2 extensions 1/2"
- ball joint 1/4"
- ball joint 1/2"
- knob 1/4"
- spark plug sockets (16, 22 mm)
- measure
- hammer 300 g
- caliper
- joint ratchet screwdriver
- bits set with adapter

PROFESSIONAL TOOL CASE - 97 ELEMENTS

CONTENTS:

- sockets 1/4" 11 pcs
- sockets 1/2" 12 pcs
- long sockets 1/4" 3 pcs
- long sockets 1/2" 2 pcs
- spark plug sockets 1/2" 2 pcs
- extension with a knob 1/2" 250 mm
- adapter
- Cardan joint 1/4"
- Cardan joint 1/2"
- extension 1/2" 125 mm
- extension 1/4" 150 mm
- extension 1/4" 50 mm
- screwdriver knob 1/4"
- bits set 20 pcs
- Locksmith's hammer
- ratchet 1/4"
- ratchet 1/2"
- adjustable pliers 250 mm
- straight pliers 200 mm
- universal pliers 175 mm
- Morse pliers 140 mm
- Morse pliers 250 mm
- flat-ring wrenches with ratchet mechanism 12 pcs
- hex keys set 9 pcs
- 10 screwdrivers

PROFESSIONAL ROLLER CABINET WITH EQUIPMENT

Durable handles covered with non-slip composite such as Soft Grip. The top which is stable and made of the highest quality materials, allows for mounting additional accessories such as tool cases, partitions, handles or a vise.

Central locking system allows to secure the tools in the workplace.

Drawers with reinforced ball guides.

Each drawer is equipped with an individual lock.

Reinforced powder-coated metal. Profiled rear of the cart improves its strength. Perforation of the side walls allows for mounting a wide variety of additional accessories. Each corner is reinforced with shock-absorbing rubber covers.

Foam inserts are oil resistant and durable in use.

Reinforced wheels with brakes.

ROLLER CABINETS EQUIPMENT FOR 791560, 79156, 79609**1****2****MODULE 1**

A set of 47 elements:

- 10 pcs. of angle keys with ball - long: 1.5 ; 2 ; 2.5 ; 3 ; 4 ; 5 ; 5.5 ; 6 ; 8 ; 10 mm
- long socket 1/4": 5 ; 6 ; 7 ; 8 ; 9 ; 10 ; 11 ; 12 ; 13 mm
- at tip screwdriver: 4 ; 5.5 ; 7
- cross-tip screwdriver: PH1, PH2, PH3, PZ1, PZ2, PZ3
- Torx type socket: T8, T10, T15, T20, T25, T27, T30, T40
- allen hexagonal socket: 3 ; 4 ; 5 ; 6 ; 7 ; 8 mm

Set of 8 screwdrivers:

- at: 6x38 / 5x100 / 4x100 / 6x150 mm
- cross: 6x38 / 5x100 / 6x100 / 6x150 mm

13 pc. Allen key set of Torx type:

T9, T10, T15, T20, T25, T27, T30, T40, T45, T50, T55, T60, T70

MODULE 2

Set of 17 pcs of combination sizes of 6 mm to 22 mm

Set of 8 bent key wrenches:

6x7 / 8x9 / 10x11 / 12x13 / 14x15 / 16x17 / 18x19 / 20x22 mm

Set of 10 open end wrenches:

6x7 / 8x9 / 10x11 / 12x13 / 14x15 / 16x17 / 18x19 / 20x22 / 24x27 / 30x32 mm

3**4**

MODULE 3

- 300 g workshop hammer with berglass handle
- bat with berglass handle
- 3 pcs. Cutters: 16 ; 18 ; 24 mm
- set of pliers: 175 mm at nose pliers, 175 mm side cutting pliers and 200 mm combination pliers

MODULE 4

Set of 19 socket wrenches with shank 1/4":

- sockets:
4 ; 4,5 ; 5 ; 5,5 ; 6 ; 7 ; 8 ; 9 ; 10 ; 11 ; 12 ; 13 ; 14 mm
- universal joint
- cross knob
- extensions: 50 ; 100 mm
- ratchet and screwdriver handle

Set of 31 socket wrenches with shank 3/8":

- hexagonal socket from 6 to 22 mm
- spark plug socket: 16 ; 21 mm

- internal Torx socket set: E10; E11; E12; E14; E16; E18; E20
- universal joint
- transverse knob
- extension 75 ; 150 mm
- ratchet

26 pcs socket wrench set with a shank 3/8":
Socket wrench set 31 with a shank 3/8":

- hexagonal socket from 10 to 32 mm
- universal joint
- transverse knob
- extensions: 125 ; 250 mm
- ratchet

COLUMN DRILLING MACHINES**► ADVANTAGES OF AIRPRESS COLUMNAR DRILLS:**

- Steel casting of the work table and the base
- Protective switch inside the belt transmission box
- Toothed table height adjustment system
- Laser pointer (non-touchable model 16-580)
- Front drill power switch
- Adjusting the drilling depth
- Table inclination +/- 45°
- Plastic drill cover
- The ability to fasten the vise
- Pulleys made of cast aluminum
- Easy adjustment of V-belts
